

Resolution nr 2

Solidarity statement with CEPETEL of Argentina

Since December of 2014 the workers at T-Gestiona of Argentina have fought against the sale of the company and outsourcing and the loss of more than 400 jobs and the Collective Bargaining Agreement with the Telefonica Group. CEPETEL has carried out trade union actions, has made formal complaints before the Labor Regulator, has denounced the issues to the press, and has declared itself in a Permanent Mobilization Assembly. At this time the company is moving forward with the sale of T-Gestiona of Argentina. The UNI ICTS World Conference, where 250 delegates representing 3 million telecommunications and IT workers are gathered in Stockholm, expresses its support for the struggle of the workers from T-Gestiona of Argentina, and sends a message of solidarity to the workers and to CEPETEL, the UNI ICTS affiliate in Argentina. At the same time, the UNI ICTS World Conference calls on Telefonica Argentina management to put forth reasonable proposals that demonstrate respect for the acquired rights contained in the agreements signed between the union and the company in 2010.
