

# ATN Family Poster

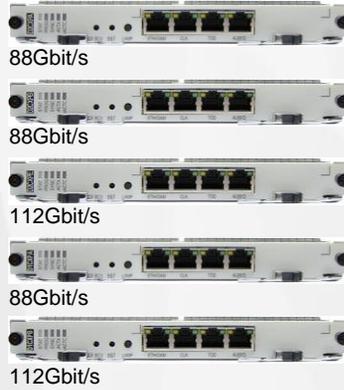

## ATN 950B

- Maximum switching capacity (bidirectional): 112Gbit/s
- Maximum forwarding performance: 83.33Mpps
- Typical power consumption: 130W
- Empty chassis weight: 2.8kg
- Dimensions (H×W×D): 87.2mm(2U)×442mm×220mm

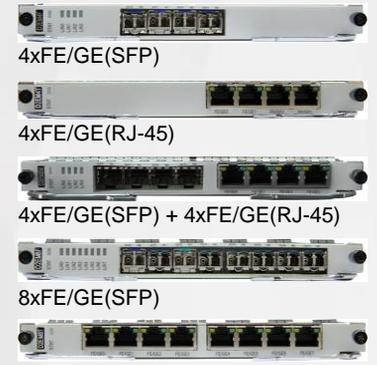

- Supports two power boards for redundancy.
- Supports two control boards for redundancy.
- The fan board provides six fans to ensure proper heat dissipation even if one fan fails.
- Six slots can be flexibly configured with service boards.

### Control board

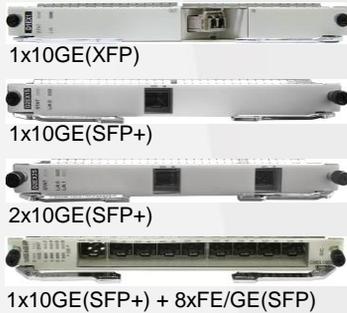

88Gbit/s  
88Gbit/s  
112Gbit/s  
88Gbit/s  
112Gbit/s

### FE/GE Ethernet interface board

4xFE/GE(SFP)  
4xFE/GE(RJ-45)  
4xFE/GE(SFP) + 4xFE/GE(RJ-45)  
8xFE/GE(SFP)  
8xFE/GE(RJ-45)

### 10GE Ethernet interface board

1x10GE(XFP)  
1x10GE(SFP+)  
2x10GE(SFP+)  
1x10GE(SFP+) + 8xFE/GE(SFP)

### E1 interface board

16xE1(75Ω)  
16xE1(120Ω)  
32xE1(75Ω)  
32xE1(120Ω)

### STM-1 interface board

4xPOS  
4xCPOS

## ATN 910B

- Maximum switching capacity (bidirectional): 128Gbit/s
- Maximum forwarding performance: 95.24Mpps
- Typical power consumption: 50W
- Weight: 3.6Kg
- Dimensions (H×W×D): 43.6mm(1U)×442mm×220mm

- Integrates non-removable boards.
- Provides three fans to ensure proper heat dissipation even if one fan fails.
- DC models provide two power inputs for redundancy of input power.

### ATN 910B-D DC

4x10GE(SFP+) + 24xFE/GE(SFP)

### ATN 910B-E AC

4x10GE(SFP+) + 24xFE/GE(SFP)

### ATN 910B-A DC

2x10GE(XFP) + 8xFE/GE(SFP)  
+8xFE/GE(RJ-45) + 16E1  
Supports 1588 ACR

### ATN 910B-B DC

2x10GE(XFP) + 16xFE/GE(SFP)  
+ 8xFE/GE(RJ-45)

## ATN 905

- Maximum switching capacity (bidirectional): 12.2Gbit/s
- Maximum forwarding performance: 9.08Mpps
- Typical power consumption: 15W
- Weight:
  - > 1.8kg (Indoor ATN 905)
  - > 2.7kg (Outdoor ATN 905)

- Dimensions (H×W×D):
  - > 43.6mm×250mm×180mm (Indoor ATN 905)
  - > 250mm×180mm×52mm (Outdoor ATN 905)

- Integrates non-removable boards.
- Provides passive heat dissipation for silent cooling.

### Indoor ATN 905 AC

2xFE/GE(RJ-45) + 2xFE/GE(SFP)  
+ 2xFE/GE(COMBO)

### Indoor ATN 905 DC

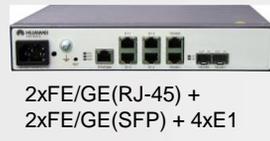

2xFE/GE(RJ-45) + 2xFE/GE(SFP)  
+ 2xFE/GE(COMBO)

### Indoor ATN 905-V AC

2xFE/GE(RJ-45) + 2xFE/GE(SFP)  
+ 2xFE/GE(COMBO) + 2xVDSL2

### Indoor ATN 905-E AC

2xFE/GE(RJ-45) +  
2xFE/GE(SFP) + 4xE1

### Outdoor ATN 905A AC

2xFE/GE(SFP) +  
2xFE/GE(COMBO)

### Outdoor ATN 905A-P AC

Supports PoE  
1xFE/GE(SFP) +  
2xFE/GE(RJ-45)+  
1xFE/GE(COMBO)

### Outdoor ATN 905A-C DC

Supports PoE  
1xFE/GE(SFP) +  
2xFE/GE(RJ-45) +  
1xFE/GE(COMBO)

### Outdoor ATN 905A-D DC

Supports PoE  
5xFE/GE(RJ-45)

### Outdoor ATN 905A-V AC

4xFE/GE(RJ-45) +  
2xVDSL2

# ATN Family Poster

## ATN 910

- Maximum switching capacity (bidirectional): 24Gbit/s
- Maximum forwarding performance: 17.85Mpps
- Typical power consumption: 30W
- Weight: 3.0kg
- Dimensions (H×W×D): 43.6mm(1U)×442mm×220mm
- Integrates non-removable boards.
- DC models provide two power inputs for redundancy of input power.

### ATN 910I-B DC Passive heat dissipation

4xGE(SFP) + 4xGE/FE(RJ-45)  
+ 4xGE/FE(COMBO)

### ATN 910I-E DC Passive heat dissipation

4xGE(SFP) + 4xGE/FE(RJ-45)  
+ 4xGE/FE(COMBO) + 16xE1

### ATN 910I-P AC

4xGE(SFP) + 4xFE/GE(SFP) + 4xFE/GE(RJ-45)  
Supports PoE

### ATN 910I-TC DC

4xGE(SFP) + 4xFE/GE(SFP)  
+ 4xFE/GE(RJ-45) + 16xE1  
Supports 1588 ACR

### ATN 910I-C AC

4xGE(SFP) + 4xFE(SFP) + 2xFE/GE(RJ-45)  
+ 2xFE(RJ-45)+16xE1  
Supports 1588 ACR

4xGE(SFP) + 4xFE/GE(SFP)  
+ 4xFE/GE(RJ-45) + 16xE1  
Supports 1588 ACR

### ATN 910I AC

4xGE(SFP) + 4xFE/GE(SFP) + 4xFE/GE(RJ-45)

### ATN 910I DC

4xGE(SFP) + 4xFE/GE(SFP)  
+ 4xFE/GE(RJ-45)

4xGE(SFP) + 4xFE/GE(SFP)  
+ 4xFE/GE(RJ-45) + 16xE1

4xGE(SFP) + 4xFE(SFP) + 2xFE/GE(RJ-45)  
+ 2xFE(RJ-45) + 16xE1 + 4xFE

## ATN 910

- Maximum switching capacity (bidirectional): 24Gbit/s
- Maximum forwarding performance: 17.85Mpps
- Typical power consumption: 50W
- Empty chassis weight: 2.36kg
- Dimensions (H×W×D): 43.6mm(1U)×442mm×220mm
- One power board provides two power inputs for redundancy of input power.
- The fan board provides three fans to ensure proper heat dissipation even if one fan fails.
- Two slots can be flexibly configured with service boards.

### Control board

13Gbit/s; 2xGE(SFP) + 4xFE(RJ-45) + 16xE1(75Ω)

13Gbit/s; 2xGE(SFP) + 4xFE(RJ-45) + 16xE1(120Ω)

13.6Gbit/s; 2xGE(SFP) + 4xFE(SFP) + 4xFE(RJ-45)

13.6Gbit/s; 2xGE(SFP) + 4xFE(SFP) + 4xFE(RJ-45)

24Gbit/s; 2xGE(SFP) + 4xFE/GE(SFP) + 4xFE/GE(RJ-45)

### Ethernet interface board

4xFE/GE(SFP)

4xFE/GE(RJ-45)

2xGE(SFP)

8xFE(SFP)

8xFE/GE(RJ-45)

### E1/T1 interface board

16xE1(75Ω)

16xE1(120Ω)

32xE1(75Ω)

32xE1(120Ω)

8xT1

### xDSL interface board

8xADSL2+

8xVDSL2

4xG.SHDSL

## ATN 950

The ATN 950 is no longer manufactured.  
The maximum switching capacity (bidirectional) of the ATN 950 is 16Gbit/s.  
The ATN 950 and ATN 910 use the same interface boards.
